

THE PORTFOLIO COLLECTION™

FABRIC ROMAN SHADES

CROSSOVER FABRICS

We are excited to announce our Fabric Roman Shade Collection is now available in a sample book format. If you have previously worked from our sample deck, the names of the fabrics in the sample deck will change once the sample books are introduced.

In addition to an improved sample book format, we are adding more fabrics to the collection. The new books will include over 100 fabrics, all shown on large sample swatches that can be removed easily. View the new collection on our website: www.prodesignllc.net/fabric-roman-shades

We ask that you move into our new sample book by March 22, 2024. This is also when the names of the patterns will be changed in our ordering system.

Please note, cord lock control has been removed from our updated collection to keep in line with upcoming WCMA requirements. Cordless will be our standard lift option, and the cost of cordless has been built into our shade grids.
